APPASAHEB BIRNALE COLLEGE
OF ARCHITECTURE, SANGLI.

Innovative Ecosystem baseline platform

Our college fosters a vibrant ecosystem for innovation, driving creative solutions in architecture, urban design, and sustainability. This ecosystem connects students, researchers, practitioners, and industry leaders to create a collaborative environment that nurtures groundbreaking ideas and their practical implementation.

Central to its approach are initiatives that prioritize the creation and transfer of knowledge. The institute conducts advanced research in architectural design, green technologies, and cultural heritage preservation. It supports interdisciplinary collaborations, blending architecture with fields like engineering, technology, and environmental science to address contemporary challenges.

Knowledge transfer is facilitated through partnerships with construction firms, urban planners, and government bodies. These collaborations enable the practical application of research, ensuring that innovations in materials, energy efficiency, and design principles are integrated into real-world projects. Additionally, the institute hosts workshops, seminars, and conferences, providing platforms for sharing ideas and inspiring the next generation of architects.

Incubation centers and design labs within the institute empower students and startups to develop prototypes and test new methodologies. By fostering creativity and bridging academia with industry, the Architecture Institute plays a pivotal role in shaping sustainable and forward-thinking architectural practices for the future.

We think that learning takes place outside of the traditional classroom. Since architecture is a professional field, we think that students should have a variety of learning opportunities available to them. The creative needs and ways to convey knowledge of this ecosystem typically differ because architecture education is fundamentally quite different from engineering or business education. We established a Design Cell to advance architectural design initiatives and serve as a bridge between academia and industry. Our students are allowed to contribute their creativity and design expertise to live projects for architectural design projects that benefit social organizations.

Our Institute Head has done Copyright work on Research topics such as Responsive Design of Public Realms, Sustainable Urbanism, and Activity Mapping.

The best of these concepts are chosen and presented to the clients by the students, giving them the opportunity to gain actual experience working on a design project as an architect. Measured drawings of historically noteworthy buildings are also created and provided, when necessary, to owners or social organizations through 'VAARSA- the Heritage Club'. There are several ways for staff and students to convey knowledge thanks to the institute. A faculty member imparts knowledge in a classroom setting through a series of lectures with the assistance of digital tools.

- For specialized creative inquiry, instructors and students connect one-on-one in a studio setting. Individually or in groups, students deliver their case studies or site visit reports to their fellow students and the lecturers in a presenting format.
- Students present their designs to all the faculty members in a jury manner during design juries. Students watch documentaries and movies about particular subjects, and then there is a debate.
- For topics like surveying and levelling, fieldwork is done by using instruments in the field and making and recording observations.
- By visiting outside resources like a history museum or a plumbing & Material lab, students can learn about a particular subject.
- Before and after creative exercises, group discussions are encouraged. Subjects like contemporary architecture are taught in seminar format.
- Seminar Site visits and study excursions provide opportunities for learning through observation and documentation.
- During study trips, an interview format is used to learn from practicing architects and professionals as well as to gain information from the people during the settlement studies.
- The library is where students can consult printed materials while they are learning, or they can borrow the books for in-depth reading.
- Online learning, using software, and creating presentations all take place at the computer lab. Heritage walks promote awareness of our own cultural heritage.
- Sketching excursions are recommended to improve observational skills.
- Workshops that students can actually participate in help them learn a specific skill.
- Market research enables students to learn about the quality and price of the materials that are currently being used.
- Through various seminars and workshops and interactive sessions with Alumni allows students to learn directly from a Master Architects who spends the entire day interacting with them.

Ecosystem for innovation and transfer of knowledge focuses on two major parts:

1. Industry academia interaction

The institute hosts seminars and workshops to connect professionals from the business with students. An external jury made up of experts from the industry resolves each semester. The purpose of intermediate juries is to help students improve their topics by receiving professional opinion. Workshops and seminars promote conversation between experts and students. Professionals are encouraged to contribute their knowledge and ideas about their professional experiences, which helps students come up with fresh concepts and discover new directions. It also facilitates the development of new perspectives on various subjects, new avenues for business, and opportunities for networking and building professional relationships.

2. Innovation and entrepreneurship development

The Institute supports, and makes changes for, the students' training overall years. The institute concentrated on:

1. Innovative teaching strategies that targeted practical activities that aided in the development of logical thinking and skill set.

2. Regular one-on-one interactions between students and teachers in the studios helped encourage entrepreneurship while ensuring the individual grooming of each student. To provide a platform for teachers and students, the leadership took a careful approach.

CREDAI Sangli : Construction Industrial expert and college has got MOU beneficiate for students to have industrial experience .

CREDAI SANGLI

Credai Sangli Expo 2023-25

DL 07/02/2024

To,
The Principal,
Appasaheb Birnale College of Architecture,
Sangli.

Subject: Regarding internship for event management.

Respected Madam,

I am reaching out to you on behalf of credai sangli exhibition regarding an exciting internship opportunity for students from Appasaheb Birnale College of Architecture, Sangli. We are interested in inviting students to participate in an internship program during an upcoming event hosted by CREDAI Sangli.

We believe that engaging students from your esteemed institution as interns will not only provide them with invaluable hands-on experience but also greatly contribute to the success of our event.

We assure you that this internship opportunity will be structured to align with the academic schedule and priorities of the students. Additionally, we will provide necessary guidance and supervision throughout the internship period to ensure a positive and enriching experience for all participants.

We understand the importance of academic commitments and will ensure that the internship roles are designed to accommodate students' schedules and priorities. Moreover, this internship experience will serve as a valuable addition to their academic journey, allowing them to apply their theoretical knowledge in a practical setting while fostering professional skills and networking opportunities.

In light of the above, we kindly request your permission to approach interested students from your institution and coordinate their participation as interns for the CREDAI Sangli event. We are confident that the participation of students from Appasaheb Birnale College of Architecture will greatly enhance our event, and we look forward to collaborating with you to facilitate this internship opportunity. Thank You,

Yours Sincerely,

Jayraj V. Sagare
President

Saillesh Pawar,
Committee Head

people towards conserving the environment. Being a prominent figure in western Maharashtra, he set up the Abharmaya Foundation in 2011 and since then there is no looking back.

Purpose:

The Parties recognize the benefits to be derived from increased collaboration, cooperation and interaction for the further research and development activities on nature conservation and environmental protection.

The purpose of this MOU is to define the areas for Awareness campaign regarding environment, Environmental Visits to Places, Schools and Colleges, fundamental academic research in which the Parties desire to work together in the future for their mutual benefit to foster a collaborative framework between APPASAHEB BIRNALE COLLEGE OF ARCHITECTURE, SANGLI and ABHARMAYA FOUNDATION in the Field with a view to benefiting from each other's initiatives and working procedures and to support collaboration among the researchers associated with both Parties

Scope:

Scope This MOU sets forth the intentions of the Parties for increased collaboration, cooperation and interaction and does not create any legally binding commitments. If the Parties later agree to undertake specific joint projects with legally binding obligations, they will develop separate written agreements for such projects, setting out each Party's contributions, deliverables, and budgets.

The parties intend to:

1. The Parties intend to pursue collaboration on fundamental, academic research, conducting training programme and conference / seminars/workshops related to nature conservation and environmental protection.
2. Strengthen the ties between both parties to make collaborative efforts in the field of Environmental Awareness.
3. Collaboration in awareness campaign and other field of mutual interest.
4. Engage students in different environmental awareness activities.
5. Provide free of cost mutual access to facilities available for the purpose of Environmental awareness.

This MOU is signed between APPASAHEB BIRNALE COLLEGE OF ARCHITECTURE, SANGLI and ABHARMAYA FOUNDATION for the Academic year 2023-2024 for the following deliverables.
