(Approved by AICTE, C.O.A New Delhi, Affiliated to Shivaji University Kolhapur)  
District – Sangli 416416

### Rain Water Harvesting

- The college gets all of its water from ground water.
- As a result, effective water use and adaption of water conservation techniques are crucial.
- Rainwater collected from roof tops is channeled through down take pipes and channelized into pits 1.5mx 1.5m size, built at all possible sites across the campus to recharge ground water, this helps in increasing the water table.

**Down take pipe for rain water harvesting**
